SUMMARY

I am a full-stack developer with a Master's in Computer Applications and hands-on expertise in the software development lifecycle. I built and launched NeoVerse.ai, an AI-powered SaaS platform using the MERN stack and Node/Express. Skilled in scalable systems, data structures, algorithms, and agile practices, I bring strong problem-solving ability and end-to-end development experience to any team.

EXPERIENCE

Candidate

Forage

📅 06/2025 - 06/2025 📍 Remote

PROJECTS

NeoVerse.ai

📅 08/2025 - 09/2025

🔗 https://neoverse-ai.vercel.app/

NeoVerse.ai

- An AI SaaS app utilizing PERN stack with LLM integration
- Features include auto-generating blog titles and outlines, prompt-based image generation, JWT/OAuth for authentication, subscription billing, and scalable deployment

---

EchoChat

📅 06/2025 - 07/2025

🔗 https://github.com/Shreyash-patil/EchoChat

A real-time chat application using MERN stack

- Implemented JWT authentication and role-based access
- Built a low-latency, bi-directional messaging with Socket.io
- Supported multimedia messaging capabilities

MediConnect-blogs

📅 12/2024 - 01/2025

🔗 https://github.com/Shreyash-patil/mediconnect-blogs

A medical blogging app utilizing React.js and Firebase

- Implemented verified doctor roles, secure authentication, and access controls
- Built real-time content updates and CRUD blog management
